Date B =

Dear :

This is in response to a letter dated February 28, 2001, requesting a ruling that Corp Y and its subsidiaries be permitted to change from the fair market value method of asset valuation to the tax book value method of asset valuation for purposes of apportioning interest expense, beginning with Date B, 2000.

The ruling contained in this letter is based upon information and representations submitted by the taxpayer and accompanied by a penalty of perjury statement executed by an appropriate party. While this office has not verified any of the material submitted in support of the request for a ruling, it is subject to verification on examination.

Corp W is a domestic corporation that is the parent of an affiliated group of corporations that files a consolidated federal income tax return on a calendar year basis. Corp W's stock is widely held and publicly traded. Corp X is an affiliated domestic indirect subsidiary of Corp W that joins in the Corp W consolidated federal income tax return. Prior to Date A, 2000, more than 80 percent of the vote and the value of all of the outstanding stock of Corp Y, a domestic corporation, was held by Corp Z. The remaining outstanding shares of Corp Y were publicly traded. Corp W and its pre-acquisition subsidiaries have consistently used the tax book value method of asset

PLR-112570-01

valuation, as described in section 1.861-9T(g) of the Temporary Income Tax Regulations, for purposes of interest expense apportionment.

On Date A, 2000, Corp Y became a wholly owned subsidiary of Corp X. Prior to this acquisition, Corp Y and its subsidiaries were part of the Corp Z affiliated group of corporations that filed a consolidated federal income tax return on a calendar year basis. Prior to Date A, the Corp Z affiliated group used the fair market value method of asset valuation, as described in section 1.861-9T(h) of the temporary regulations, for purposes of apportioning interest expense.

As a result of the acquisition, Corp Y and its subsidiaries will be included in Corp W's consolidated federal income tax return for the portion of Corp W's taxable year that post-dates the acquisition. The post-acquisition portion of Corp W's taxable year begins on Date B, 2000.

Section 864(e)(2) of the Internal Revenue Code provides that all allocations and apportionments of interest expense shall be made on the basis of assets rather than gross income.

Section 1.861-9T(g)(1)(ii) of the temporary regulations provides that, for purposes of apportioning interest expense, a taxpayer may elect to determine the value of its assets on the basis of either the tax book value or the fair market value of its assets. Section 1.861-8T(c)(2) provides that once a taxpayer uses the fair market value method, the taxpayer and all related parties must continue to use such method unless expressly authorized by the Commissioner to change methods.

Section 1.861-9T(g)(1)(iii) provides that if the taxpayer chooses the fair market value method of asset valuation, the taxpayer must establish the fair market value of its assets to the satisfaction of the Commissioner. Otherwise, the Commissioner may determine the appropriate values or require the taxpayer to use the tax book value method of apportionment. Section 1.861-9T(h) sets forth the rules for determining the fair market value of taxpayer's assets under the fair market value method for purposes of apportioning interest expense.

Corp W requests, pursuant to sections 1.861-8T(c)(2) and 1.861-9T(g)(1)(ii), that Corp Y and its subsidiaries be permitted to use the tax book value method of asset valuation beginning on Date B, 2000. This request was made in order to conform Corp Y and its subsidiaries to the method of asset valuation used by other members of the Corp W consolidated group.

An additional basis for Corp W's request is that Corp W and its pre-acquisition subsidiaries wish to remain on the tax book value method of asset valuation. Corp W's ruling request states that it desires to retain the tax book value method because that method: (1) decreases complexity and avoids potential disagreements with the Service

PLR-112570-01

with respect to the fair market value of assets; (2) avoids the cost of having fair market value studies performed; and (3) provides greater certainty of tax results to both the taxpayer and the Service.

Based solely upon the information submitted, the representations made, and the reasons given for this request, Corp Y and its subsidiaries may change from the fair market value method of asset valuation for purposes of apportioning interest expense to the tax book value method of asset valuation, pursuant to sections 1.861-8T(c)(2) and 1.861-9T(g)(1)(ii), beginning on Date B, 2000.

Except as expressly provided herein, no opinion is expressed or implied concerning the tax consequences of any aspect of any transaction or item discussed or referenced in this letter.

This ruling is directed only to the taxpayer(s) requesting it. Section 6110(k)(3) of the Code provides that it may not be used or cited as precedent.

In accordance with the Power of Attorney on file with this office, a copy of this letter is being sent to your authorized representative.

A copy of this letter must be attached to any income tax return to which it is relevant.

Sincerely,
Anne O'Connell Devereaux
